Do you have a heavyweight product that needs the strength of corrugated but the graphic impact of boxboard? Strathcona has the answer with our superior strength heavyweight board. Engineered with our high caliper D-Cote, this is but one example of our board’s ability to provide all the product integrity you need with superior consumer impact at the shelf.

GreenChoice 100 is North America’s most eco-friendly 100% recycled paperboard. Not only is it 100% recycled, GreenChoice 100 is carbon neutral and 100% of the energy used in its manufacture is offset with clean energy. When you choose GreenChoice 100 eco-certified paperboard, brand owners have the opportunity to select from a series of attractive eco-logos intended to communicate directly to consumers at shelf in an impactful and easy to understand manner. GreenChoice 100’s superior strength properties makes it the ideal substrate for reducing caliper, using less paper, and saving money.

Is your customer concerned about product integrity and freezer shelf life? All Strathcona board is available with a special biodegradable and recyclable agent that ensures that both the packaging and its contents withstand even the most demanding humidity. And your customer will be assured that the consumer buys a product that is as appealing and fresh as the day it left the factory.

The food industry is intensely competitive and when it comes to adding value to your customer relationship, you need every advantage you can get. Absolutely! Food is the first recycled boxboard to have both Health Canada and Canadian Food Inspection Agency acceptance for direct food contact, in addition to meeting FDA requirements. Whether it’s frozen food, cereal, crackers or bakery cartons, Absolutely! Food is the ideal choice for food packaging.

When designing a carton that requires the strength of corrugated and the brightness of solid bleached, but demands the printing and converting performance of boxboard, all at a very competitive price, Strathcona Boxboard stacks up.

Strathcona expects to be compared to the industry and our competition. We produce a board that is denser, stiffer and brighter than the industry average, but also with a plybond strength that is significantly better. In independent comparisons of over 100 competitive products Strathcona continues to prove our claim of superior product and superior quality.
Strathcona Paper's manufacturing facility is located in Napanee, Ontario. Our marketing and sales activities are conducted through sales offices located in Toronto, Montreal and the United States. Call your Strathcona representative or packaging supplier today to learn more about Strathcona's recycled paperboard products.

Who we are

Strathcona Paper is one of Canada’s leading manufacturers and suppliers of 100% recycled clay coated boxboard. Our specialty is manufacturing superior quality, medium to heavyweight caliper board for those applications that demand high stiffness and strength.

We are the packaging choice for many of the leading brand manufacturers in North America. You can find Strathcona products in most of North America’s leading retail outlets – in the packaging of foods and household goods ranging from frozen food, dry food and beverages to laundry detergent, toys, pet products and hardware.

Our vision

To be North America’s premier supplier of specialized paper based packaging solutions.

We will achieve this by:

- Continuously exceeding customer expectations with superior product and superior service
- Improving our customers’ performance and ability to compete
- Rapidly growing and seizing opportunities
- Fostering an innovative and entrepreneurial culture
- Financially out performing industry peers

Strathcona Paper is proud of its 137 year history of serving customers with high quality products and service. We are proud of our industry leading environmental practices and our innovations in the marketing and manufacturing of recycled products for consumers.

Our products

Our products stand out for their proven performance on press, on the filling line, on the shelf and in the consumer’s hand. And it is our innovative approach and orientation to solutions that has led to some of the largest national and private label brand manufacturers specifying Strathcona as their board of choice.

Customers

Love it and so do their Customers

Nothing excites us more than working with our customers to help profitably grow their business. From emergency requests that require making and shipping within 24 hours, to partnering in the development of custom solutions, we really do put our customers first. Service, Quality and Innovative Solutions are what make the Strathcona Difference.

Service

Putting the customer first is a long tradition at Strathcona Paper. We are flexible, we are adaptable and we are innovative. Whether it be web enabling our supply chain or just keeping an inventory of key sizes on hand to allow you the flexibility to quickly react to your customers’ changing needs, our service team is there for you. And we stay with you right until your converted boxes are out the door – Strathcona quality and technical support is available 24/7 in the event that a board or press problem ever occurs.

Quality

Quality is an obsession at Strathcona. Strathcona has a reputation for quality that is second to none in our industry. From the time recycled fibres arrive at our loading dock, to the moment finished product is put on our trucks, a rigorous routine of 24 quality performance checks must be passed. Roll, after roll, after roll.

Our products

Our products stand out for their proven performance on press, on the filling line, on the shelf and in the consumer’s hand. And it is our innovative approach and orientation to solutions that has led to some of the largest national and private label brand manufacturers specifying Strathcona as their board of choice.

Tangible results. Infinite possibilities.
